hello BRIDE TO BE!

Planning your most special wedding day can be overwhelming, especially when being exposed to so many colour schemes, styles and wow factors while browsing Pinterest, Instagram and other social platforms.

Our **Hot Shot Events Management Wedding Look-Book** aims to provide you with inspiration of current trending styles, to give you a quick glance at the decor possibilities for your wedding celebration!

Factors to consider when choosing *Your theme.*

SEASON: Generally, darker and moodier tones are paired with colder months; while softer and lighter colours tend to work better during summer and spring. However, at the end of the day it all comes down to personal preference - nothing is set in stone and it is YOUR DAY!

SETTING: Each venue and location's style and setting is different. Your floral and decor style will most likely adapt to what compliments your venue's setting. Ask yourself, does the venue lend itself to a more minimalist or maximalist style? Does the venue need to be uplifted with additional floral and decor to truly make the space magical?

MOOD: All bridal couples have different objectives of how they would like the mood to be on the day of their wedding, and your colour palette plays a big role in this. For example: Looking for a classic and refined celebration? A neutral colour palette with softer tones and warm lighting will be the way to go! OR are you looking to create an over-the-top festive celebration? Then, you may want to consider bright and vibrant pops of colour to embrace the fun vibe you're trying to create.

FLORAL: Consider whether there are any specific flowers that you absolutely adore - do they come in the shade or colour that you like? And what other colours and flower styles compliment this?

BUDGET: Here comes the tough one. There are decor styles available for every budget, it is however important to keep in mind that not all visions and budgets align. Our advice is to find a style that you like, and tailor it to best suit your budget.
